**Career Explorations in Arts and Sciences**

*Tired of not knowing how to answer the question, “So what are you going to do with that degree?” Wondering how you can pursue purpose and a paycheck? Come learn about the ways that SAS majors build relevant skills for many jobs and have fun working with others to explore options.*

- **Understand your purpose:** Assess your interests and values; identify career and life skills you are building at SAS.
- **Explore careers:** Research careers you can enter, from those directly related to your major, to careers in **business** & other fields!
- **Develop your skills:** Learn to talk with employers and parents about career-specific skills you are learning as you study arts and sciences; connect with young alumni; develop your resume and plan for next steps.
- **Have fun** creating your pathway to a purpose-filled life and career after college!
