

### Summer Reflection

My biggest success over the summer had to be achieving the letter grades needed to continue enrollment at Rutgers while balancing beginning a new job. Through my training at work and my studies at school I managed to find the time to perform well in everything I was doing. It felt great to see that do well in school and work at the same time. I would go straight from work to campus and use my gaps for study time. I made sure to write everything down and attend every class. I learned that communicating with your professor makes things easier and less intimidating. I am excited to go back in the fall and power through.

### Rutgers Resource

A Rutgers resource I have used and used often are the advisors and counselors on campus. It helps to be able to talk to someone about the things you are unsure of. Sometimes fresh eyes or experienced people can guide you in the right direction while also making you feel less overwhelmed.

### My S.M.A.R.T Plan

Receive letter B grades for fall classes	do assignments on time, study, attend class
Apply to 5 internships by November	Keep an eye on emails and attend career fairs
Develop better sleeping habits	Sleep earlier, listen to my body

### My Inspiration

My inspiration comes from those around me who balance all their responsibilities and excel doing so. I am not an artist myself, a musician, or a jock, but I do feel I am rather inspired by those who are because of the dedication it takes to continue forward and amount of time you put in to yourself to do so. It is a reminder that YOU (me) comes first and you should always work toward what's best for you.

### Challenges

Challenges I faced this summer managing personal time into work and school. I made sure to plan ahead this way I could give myself personal time and still do things I love. Including personal time is a challenge I still anticipate for the fall but I know if I set time aside and stick to a schedule I can manage fitting in my personal activities too.
